TRUST & SAFETY INVESTIGATIONS | POLICY ENFORCEMENT | UGC PLATFORM INTEGRITY

marpuredysindhu@gmail.com | +91 99630 51765 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

Senior Trust & Safety professional with 10+ years of experience investigating abuse and enforcing policy on large user-generated content platforms. Lead complex, high-severity investigations using internal tools, OSINT, and cross-platform signals, resolving 500+ escalations annually and making high-confidence enforcement decisions. Adjudicate edge cases, run calibration sessions, and write SOPs and runbooks; monitor case quality and abuse trends and turn them into policy, workflow, and tooling improvements. Coach and lead analysts, including a 108-member multilingual team, and partner with Engineering, Security, Legal, and Threat Intelligence.

## CORE STRENGTHS

|                                                                                                                                                   |                                                                                                                                    |
|---------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| <b>Investigations &amp; Enforcement</b><br>Complex and high-severity cases, OSINT, cross-platform evidence, high-confidence enforcement decisions | <b>Policy &amp; Edge-case Adjudication</b><br>Policy interpretation, appeals and escalation review, policy gaps, SOPs and runbooks |
| <b>Calibration &amp; Coaching</b><br>Calibration sessions, analyst coaching, training, feedback, new-hire mentoring, team leadership              | <b>Quality &amp; Abuse Trends</b><br>Case quality, accuracy, false-positive rate, TAT, escalation trends, RCA, trend analysis      |

## PROFESSIONAL EXPERIENCE

### Legal Analyst - AI Governance & Legal Operations

CrowdStrike | June 2026 to Present

- Evaluate internal AI-agent responses for accuracy, hallucinations, policy compliance, and failure modes while maintaining audit-ready records.
- Build structured QC evaluation frameworks and quality standards for AI-assisted workflows, documenting recurring defects and improvement opportunities.
- Developed Sage, an AI-assisted legal policy librarian using Google Apps Script, to automate policy tracking and improve governance accuracy.
- Curate the RAG knowledge base and legal content library that grounds agent responses, validating source content and policy alignment.

### Senior Intelligence Consultant

ALICE, formerly ActiveFence | March 2026 to April 2026

- Drove intelligence gathering for a Rapid Alert Team across the Indian landscape, analyzing evolving social and security narratives through OSINT, intelligence-led research, and proactive threat hunting.
- Delivered early-warning signals through cross-platform trend synthesis and narrative forensics, translating ambiguous signals into actionable intelligence.

### Trust and Safety Specialist II

GitHub (Microsoft) | April 2021 to January 2026

- Investigated Account Takeover, malware, phishing, crypto fraud, TVEC, CSAM, adult content, NCII, and coordinated abuse on a large open-source platform, resolving 500+ escalations annually.
- Led high-severity escalations across Legal and Engineering, reducing incident resolution time by 30% through structured investigation, coordination, and remediation.
- Led calibration, edge-case adjudication, SOP/runbook development, and quality reviews; escalation SME for novel abuse patterns; built Argus, ReflectoCat, FatiGat, and OctoMask.
- Translated abuse patterns and operational gaps into 50+ process improvement plans; partnered with Engineering, Security, and Threat Intelligence to improve detection, remediation, and platform safeguards.
- Designed AI moderation evaluation frameworks using accuracy, precision, false-positive rate, and turnaround-time measures; improved review accuracy by 25% and reduced high-risk case turnaround by 20%.

### **Trust and Safety Quality Analyst**

**Meta via Genpact** | September 2016 to April 2021

- Led quality operations for a 108-member team across Indian English, Hindi, and Odia workflows, maintaining consistent review standards at scale.
- Trained and mentored new hires and ran calibration and targeted feedback to keep policy decisions consistent and improve team workflows.
- Investigated fraud, policy, and quality issues and analyzed gaps between policy requirements and negative user experiences.
- Reviewed suspicious activity and identified trend characteristics to improve process automation and workflow efficiency.

### **Trust and Safety Process Associate**

**Facebook via Spectraforce** | May 2015 to August 2016

- Reviewed reported content for policy violations and took action on impersonation and abusive behavior.
- Supported a 98% satisfaction result with an error rate below 2%; identified user-reported trends and contributed to performance and consistency initiatives.

### **Process Associate, Geo Operations**

**Google Maps via Minvesta** | November 2012 to April 2015

- Mentored new hires and quality-controlled 3D modeling and Street View mapping workflows, maintaining quality and productivity standards.
- Contributed feedback to an internal modeling tool based on escalation analysis and prepared performance grids to evaluate operator performance across multiple factors.

## **SELECTED PROJECTS**

[Argus](#) - Risk-intelligence dashboard for emerging abuse signals and narrative trends across 15 categories.

[Sage](#) - AI-assisted legal policy librarian for policy tracking, agent evaluation, and RAG knowledge governance.

[ReflectoCat](#) - Communication analysis and quality-signal tooling.

[FatiGat](#) - Fatigue-analysis and quality signal tooling.

[OctoMask](#) - Privacy-aware text anonymization and developer tooling.

## **EDUCATION & CREDENTIALS**

**Bachelor of Technology, Computer Science Engineering**, BPUT | CGPA 7.3

**Lean Six Sigma Yellow Belt** - Process Improvement & Continuous Improvement Methodology

## **LANGUAGES**

English, Odia, Hindi, Telugu
